

FBISE Class 9 Physics - Final Guess 2026

For Annual Exam | SLO Based New Pattern

Studybeesofficial

UNIT 1: PHYSICAL QUANTITIES AND MEASUREMENT [BASIC CHAPTER]

- Vernier Calipers and Screw Gauge - Least Count, Zero Error, How to use [MOST IMPORTANT - SHORT + LONG]
- Measuring Cylinder and Stop Watch

UNIT 2: KINEMATICS [MOST IMPORTANT]

- Types of Motion (Translatory, Rotatory, Vibratory)
- Graphical Proof of 3 Equations of Motion [CONFIRMED]

UNIT 3: DYNAMICS - I [MOST IMPORTANT UNIT OF PHYSICS]

- Newton's Three Laws of Motion + Daily Life Examples + Limitations [MOST IMPORTANT - LONG]
- Momentum - Relation of Force with Rate of Change of Momentum $F = \Delta P / \Delta t$ [MOST IMPORTANT]
- Law of Conservation of Momentum (Isolated System) [MOST IMPORTANT]
- Mass vs Weight - Difference + $W = mg$ Numerical + Weightlessness Condition [NUMERICAL IMPORTANT]
- Contact Forces (Friction, Tension) vs Non-contact Forces (Gravitational, Electric)

UNIT 4: DYNAMICS - II (TURNING EFFECT + GRAVITATION)

- Center of Mass vs Center of Gravity - Definitions + Examples
- Conditions of Equilibrium + Types (Static/Dynamic) + States (Stable, Unstable, Neutral) [MOST IMPORTANT]
- What is Friction? Advantages and Disadvantages in Detail [MOST IMPORTANT]
- Methods to Reduce Friction - Ball Bearings, Lubricants, Polishing
- Centripetal Force - Formula $P = mv^2/r$ and Role

UNIT 5: PRESSURE AND DEFORMATION IN SOLIDS

- Newton's Law of Gravitation + Method to Find Mass of Earth [MOST IMPORTANT LONG]
- Hooke's Law - Statement + Graph + Stress/Strain
- Barometer vs Manometer - Working and Difference
- Pascal's Law + Applications - Hydraulic Lift and Hydraulic Brake [MOST IMPORTANT]
- Derivation of Liquid Pressure $P = \rho gh$ [MOST IMPORTANT]

UNIT 6: WORK AND ENERGY [NUMERICAL CHAPTER]

- Derivation of Kinetic Energy $E_k = 1/2 mv^2$ & Potential Energy $E_p = mgh$ [MOST IMPORTANT LONG]
- Law of Conservation of Energy + Energy Transformation Examples
- Renewable vs Non-renewable Energy Sources
- Power, Watt, Joule and Efficiency - Formulas + Numericals [MOST IMPORTANT]
- All Numericals of Chapter 6 - 1 Question Confirmed in Board

UNIT 7: THERMAL PROPERTIES (DENSITY AND TEMPERATURE)

- Thermal Expansion and Types (Linear, Volume)
- Bimetallic Strip
- Factors Affecting Evaporation and How to Increase it

TOP 3 LONG QUESTIONS FOR 2nd ANNUAL: (NEW SLO BOOK 2026)

1. Graphical Derivation of 3 Equations of Motion + Law of Conservation of Momentum (Isolated System)
2. Resolution of Forces (Rectangular Components) + Conditions of Equilibrium & States of Equilibrium (Stable/Unstable/Neutral)
3. Derivation of Kinetic Energy $E_k = \frac{1}{2} mv^2$ & Potential Energy $E_p = mgh$ + Pascal's Law + Applications + Derivation of Liquid Pressure $P = \rho gh$

TIPS FOR PHYSICS PAPER: (NEW PATTERN 2026)

1. Numerical Tip: Chapter 3 (Dynamics-I), Chapter 4 (Dynamics-II) and Chapter 6 (Work & Energy) se 2-3 numerical lazmi ate hain. Formulas $W = mg$, $F = ma$, $F = \Delta P / \Delta t$, $E_k = \frac{1}{2} mv^2$, $E_p = mgh$, $P = F/A$, $P = \rho gh$, $\tau = F \times d$ yaad kar lo.
2. Long Question Trick: New book me Atwood Machine ki jagah Graphical Equations of Motion aur Energy Derivation zyada important hai. Resolution of Forces aur Pascal's Law har saal repeat hota hai.
3. Presentation: Har definition ke sath SI Unit, Formula aur Diagram lazmi banao. SLO paper me diagram aur SI
4. Most Important: Unit 3 (Dynamics-I) and Unit 4 (Dynamics-II) + Unit 6 (Work & Energy) ko sab se zyada time do, in 3 units se 40% paper aata hai 2nd annual me.

TOP 6 MOST IMPORTANT LONG QUESTIONS FOR 2nd ANNUAL: (NEW SLO BOOK 2026 – NBF) – MUST PREPARE

- 1 CHAPTER 1 - Physical Quantities & Measurement:**
Vernier Calipers and Screw Gauge - Construction, Working, Least Count, Zero Error & Zero Correction + Significant Figures
[MOST IMPORTANT - DIAGRAM]
- 2 CHAPTER 2 - Kinematics:**
Graphical Derivation / Proof of Three Equations of Motion: $v_f = v_i + at$, $S = v_i t + \frac{1}{2} at^2$, $2aS = v_f^2 - v_i^2$ **[CONFIRMED LONG 2026]**
- 3 CHAPTER 3 - Dynamics-I:**
Newton's Second Law - Relation of Force with Rate of Change of Momentum $F = \Delta P / \Delta t$ and $F = ma$ + Law of Conservation of Momentum (Isolated System) with Daily Life Examples **[MOST IMPORTANT]**
- 4 CHAPTER 4 - Dynamics-II:**
Resolution of Forces (Rectangular Components) + Conditions of Equilibrium (1st & 2nd) + States of Equilibrium (Stable, Unstable, Neutral) + Centripetal Force $F = mv^2/r$ **[MOST REPEATED]**
- 5 CHAPTER 5 - Pressure and Deformation in Solids:**
Pascal's Law - Statement + Applications (Hydraulic Lift & Hydraulic Brake) + Derivation of Liquid Pressure $P = \rho gh$ + Hooke's Law with Stress-Strain Graph **[IMPORTANT LONG]**
- 6 CHAPTER 6 - Work and Energy:**
Derivation of Kinetic Energy $E_k = \frac{1}{2} mv^2$ & Potential Energy $E_p = mgh$ + Law of Conservation of Energy + Power and Efficiency (Formulas & Numerical) **[NUMERICAL + LONG CONFIRMED]**

GOLDEN TIP:

In SLO Paper, Q3 & Q4 (Dynamics) and Q6 (Work & Energy) se 2 long lazmi aate hain. In 3 chapters ki full tayari = 60% long paper covered.

FBISE Class 9 Physics - Final Guess 2026

For Annual Exam | SLO Based New Pattern - NBF • Studybeesofficial

UNIT 1: PHYSICAL QUANTITIES AND MEASUREMENT [BASIC CHAPTER]

- Vernier Calipers and Screw Gauge - Least Count, Zero Error, How to use [MOST IMPORTANT - SHORT + LONG]
- Measuring Cylinder and Stop Watch
- Significant Figures, Scientific Notation, Prefixes

UNIT 2: KINEMATICS [MOST IMPORTANT]

- Types of Motion (Translatory, Rotatory, Vibratory)
- Graphical Proof of 3 Equations of Motion [CONFIRMED LONG]
- Rest and Motion, Scalars and Vectors, Speed, Velocity, Acceleration

UNIT 3: DYNAMICS - I [MOST IMPORTANT UNIT]

- Newton's Three Laws of Motion + Daily Life Examples [MOST IMPORTANT - LONG]
- Momentum - Relation $F = \Delta P / \Delta t$ [MOST IMPORTANT]
- Law of Conservation of Momentum (Isolated System) [MOST IMPORTANT]
- Mass vs Weight - $W = mg$ Numerical + Weightlessness
- Contact vs Non-contact Forces (Friction, Tension, Gravitational)

UNIT 4: DYNAMICS - II [MOST IMPORTANT]

- Center of Mass vs Center of Gravity
- Conditions of Equilibrium + Types (Static/Dynamic) + States (Stable, Unstable, Neutral) [MOST IMPORTANT]
- Friction - Advantages, Disadvantages, Methods to Reduce
- Centripetal Force $F = mv^2 / r$ + Orbital Motion + Artificial Satellites
- Resolution of Forces (Rectangular Components) [LONG CONFIRMED]

UNIT 5: PRESSURE AND DEFORMATION IN SOLIDS [MOST IMPORTANT]

- Hooke's Law - Statement + Graph + Stress/Strain [IMPORTANT]
- Pascal's Law + Applications - Hydraulic Lift and Brake
- Derivation of Liquid Pressure $P = \rho gh$ [MOST IMPORTANT]
- Barometer vs Manometer - Working and Difference
- Elasticity and Pressure in Solids

UNIT 6: WORK AND ENERGY [NUMERICAL CHAPTER]

- Derivation of Kinetic Energy $E_k = \frac{1}{2} mv^2$ & Potential Energy $E_p = mgh$ [MOST IMPORTANT LONG]
- Law of Conservation of Energy + Transformation Examples
- Power, Watt, Joule and Efficiency - Formulas + Numericals [MOST IMPORTANT]
- Renewable vs Non-renewable Energy Sources
- All Numericals of Chapter 6 - 1 Question Confirmed

UNIT 7: DENSITY AND TEMPERATURE [THERMAL PROPERTIES]

- Density - Definition, Formula, Units
- Thermal Expansion and Types (Linear, Volume)
- Temperature Scales (Celsius, Kelvin, Fahrenheit)
- Bimetallic Strip - Working and Uses
- Factors Affecting Evaporation and How to Increase it [SHORT IMPORTANT]

UNIT 8: MAGNETISM [SHORT + MCQ - NEW ADDED]

- Properties of Magnets + Magnetic Field Lines [MOST IMPORTANT SHORT]
- Temporary and Permanent Magnets - Difference
- Uses of Magnets in Daily Life
- Magnetic Field and Electromagnetism - Basics
- MCQs and Short Questions - Must Prepare for Objective

UNIT 9: NATURE OF SCIENCE AND PHYSICS [SHORT + MCQ CHAPTER] - NEW ADDED

- What is Science? Scientific Method Steps [IMPORTANT SHORT]
- Branches of Physics (Classical, Modern, Applied)
- Relation of Physics with Other Sciences and Technology
- Role of Physics in Daily Life and Society
- Important MCQs from Chapter 9 - 2-3 MCQs Confirmed in Paper

PHYSICS EXAM TIPS FOR 2nd ANNUAL 2026 (SLO Based):

- 1. Presentation:** Har answer me SI Unit + Formula + Diagram lazmi lagao. SLO paper me diagram ke 2 extra marks hain.
- 2. Time Management:** Pehle MCQs 15 min me khatam karo, phir Short Questions, akhir me Long. Numericals ke steps mat chhoro.
- 3. Numerical Trick:** $W=mg$, $F=ma$, $F=\Delta P/\Delta t$, $E_k=1/2 mv^2$, $E_p=mgh$, $P=F/A$, $P=\rho gh$, $\tau=F \times d$ formulas yaad rakho. Chapter 3, 4, 6 se 1 numerical pakka.
- 4. Long Questions:** Unit 3 (Dynamics-I), Unit 4 (Dynamics-II) aur Unit 6 (Work & Energy) se 2 long lazmi aate hain. Inki derivation graph ke sath yaad karo.
- 5. Short Chapters:** Unit 8 (Magnetism) aur Unit 9 (Nature of Science) se sirf MCQs aur short aate hain, inko halka mat lo - 8-10 marks inhi se aate hain.
