SECTION – B (Marks 40)

Q. 2 Read the following passage carefully and answer the questions appended to it.

Note: Question No. (i) about summary writing is carrying 08 marks while rest of the questions carry 04 marks each (8 + 5 x 4 = 28)

Access to safe water, sanitation and hygiene is the most basic human need for health and well-being. Billions of people will lack access to these basic services in 2030 unless progress quadruples. Demand for water is rising owing to rapid population growth, urbanization and increasing water needs from agriculture, industry and energy sectors. The demand for water has outpaced population growth, and half of the world's population is already experiencing severe water scarcity at least one month a year. Water scarcity is projected to increase with the rise of global temperatures as a result of climate change. Investments in infrastructure and sanitation facilities; protection and restoration of water-related ecosystems; and hygiene education are among the steps necessary to ensure universal access to safe and affordable drinking water for all by 2030, and improving water-use efficiency is one key to reducing water stress.

There has been positive progress between 2015 and 2022, the proportion of the world's population with access to safely managed drinking water increased from 69 percent to 73 percent. Why? Access to water, sanitation and hygiene is a human right. To get back on track, key strategies include increasing sector-wide investment and capacity-building, promoting innovation and evidence-based action, enhancing cross-sectorial coordination and cooperation among all stakeholders and adopting a more integrated and holistic approach to water management. Water is essential not only to health, but also to poverty reduction, food security, peace and human rights, ecosystems and education.

Nevertheless, countries face growing challenges linked to water scarcity, water pollution, degraded water related ecosystems and cooperation over trans-boundary water basins.

Q. 2 Read the following passage carefully and answer the questions appended to it.

Note: Question No. (i) about summary writing is carrying 08 marks while rest of the questions carry 04 marks each (8 + 5 x 4 = 28)

The day slowly passed. As it grew dark, they could still see the leaf hanging from its branch against the wall. And then, as the night came, the north wind began again to blow. The rain still beat against the windows. When it was light enough the next morning, Johnsy again commanded that she be allowed to see.

The leaf was still there.

Johnsy lay for a long time looking at it. And then she called to Sue, who was cooking something for her to eat.

"I've been a bad girl, Sue," said Johnsy. "Something has made that last leaf stay there to show me how bad I was. It is wrong to want to die. I'll try to eat now. But first bring me a looking-glass, so that I can see myself. And then I'll sit up and watch you cook".

An hour later she said, "Sue, someday I hope to paint the Bay of Naples." The doctor came in the afternoon. Sue followed him into the hall outside Johnsy's room to talk to him.

"The chances are good," said the doctor. He took Sue's thin, shaking hand in his. "Give her good care, and she'll get well. And now I must see another sick person in this house. His name is Behrman. A painter, I believe. Pneumonia, too. Mike is an old weak man, and he is very ill. There is no hope for him. But we take him to the hospital today. We'll make it as easy for him as we can".

The next day the doctor said to Sue: "She's safe. You have done it. Food and care now— that's all."

And that afternoon, Sue came to the bed where Johnsy lay. She put one arm round her.

The first step in your choice of career is self-assessment and retrospection: what do I know about myself? Determining what your skills are, what you enjoy doing and what is important to you in your work and life is part of the process of self-assessment, which is fundamental to career development. Knowing what matters to you makes it so much easier to make your way to a great job. Your hobbies and leisurely pursuits can give you great insight into future career paths.

Some careers may be started with a high school diploma; others may require a two-year or four-year degree. Some fields require certification for your chosen path.
